In celebration of International Darwin Day 2021, ANU biological anthropologists will discuss how they use evolutionary principles in their research investigating humans as a species.

Webinar schedule

10-10.35am AEDT - 3 minute talks:

Dr Katharine Balolia

How can we reconstruct the social lives of our ancestors?

Associate Professor Alison Behie

How do natural disasters change our evolutionary trajectory?

Dr Geoff Kushnick

Can evolutionary thinking help us understand why people own land?

Dr Clare McFadden

What can past human populations tell us about adapting to island life?

Dr Justyna Miskiewicz

How have our bones changed over the last 10,000 years?

Dr Stacey Ward

Does being the black sheep make you sick?

Dr Laura Wilson

Why didn't we domesticate the zebra and what does it tell us about human evolution?

10.35-11.00am AEDT - panel discussion with Q&A from participants
